Paediatric and Perinatal Epidemiology 1996, **10**, 478–479

Subject Index for Volume 10

Aboriginal children 175–185
Aborigines, and SIDS 309–318
Abortion *see* Termination
Abruption, and cocaine 269–278
Abruption, and smoking 269–278
Accidents 463–464
Accuracy, of malformation registry 161–174
ALSPAC 279–293
Analgesia, antenatally 39–51
Anencephaly 6,7
Anxiety 389–391
Apgar, and prior CS 374–375
Arsenic 23
Autopsy, of perinatal death 97–105, 106–109, 363–364

Birmingham Birth Register 8–11
Birth defects *see* Congenital malformations
Birth order *see* Parity
Birth to Ten Study 150–160
Birthweight 39–51, 207–219
Birthweight – *see* also Macrosomia
Birthweight, and cocaine 269–278
Birthweight, and hospitalisation 175–185
Birthweight, and immigrant status 240–241
Birthweight, and limb reduction defects 294–308
Birthweight, and maternal weight gain 220–234
Birthweight, and prior CS 374–375
Birthweight, and SIDS 309–318
Birthweight, and smoking 269–278
Birthweight, and survival 423–431
Birthweight, low 130–135
Body mass index, maternal 207–219

Cadmium 23
Caesarean section 366–379
Cancer, in childhood 73–85, 319–338, 462
Cars, and leukaemia 411–417
Cerebral palsy 335–357, A1–A20
Child development 197–206
Cigarettes *see* Smoking
Cleft lip and palate 6
Climate, and SIDS 136–149
Cocaine, maternal 269–278
Cola consumption, in pregnancy 39–51
Congenital dislocation of the hip 6
Congenital heart disease 6
Congenital limb reduction defects 294–308
Congenital Malformation Registry of New York State 294–308
Congenital malformations 2–16
Congenital malformations, and EMf 32–38
Congenital malformations, and prior CS 374–375
Congenital malformations, and the environment 22–31
Copper 23
Copper smelter 22–31
Cryptorchidism 39–51
CS *see* Caesarean section

Depression, maternal 279–293, 384–405
Depression, post-natal 279–293
Diabetes, maternal – and congenital malformations 52–63, 469–476
Diabetes, maternal – and previous obstetric history 64–72
Diet of infant 150–160
Distress 389–393
Down's syndrome 6
D-penicillamine 407
DQ *see* Child development

Ectopic pregnancy 372–373
Electromagnetic fields 32–38
Energy intake 150–160
Epilepsy 186–196
Epinephrine 384
Ethiopian study 443–462
Ethnic group 39–51
Eugenics 17–19
Exomphalus 6

Fat 150–160
Fertility, after Caesarean section 366–379
Fetal growth 244–263
Fetal growth rate 207–219
Fetal growth retardation 380–405

Genital herpes 432–442
Geographic information system 466–467
Gestation 301 *see also* Preterm
Gestation, and prior CS 374–375
Glue ear 464–466

Health care, primary 339–354
Herpes simplex 432–442
Hormone, placental corticotropin-releasing 384
Hospitalisation 175–185
Hypertension in pregnancy – definition 247
Hypertension, pregnancy-induced 244–263

I.Q. *see* Child development
Income 186–196
Infection, neonatal 432–442
Infertility, after CS 369–372
Inter-birth interval 86–96
Intrauterine growth retardation 244–263
Isolation, geographic 411–417

Language development 468
Latent Markov modelling methods 279–293

© 1996 Blackwell Science Ltd.

Lead 23
Leukaemia
Life events 387

Macrosomia, and subsequent diabetes 64–72
Malformation Registeries 161–174
Marital status 309–318
Marital status, and hospitalisation 175–185
Maternal age 301, 309–318, 418–422
Maternal age, and congenital malformations 7
Maternal age, and hospitalisation 175–185
Maternal education 86–96, 186–196, 301
Maternal mortality 418–422
Maternal occupation 86–96
McKeown, Tom 2–16
Mercury 23
Miscarriage, after CS 372–373
Mortality *see* Maternal, Perinatal, Postneonatal

Necropsy rate *see* Autopsy
Neonatal care 423–431
Neonatal mortality, and prior CS 374–375
New York State Congenital Malformations Registry 161–174
Norepinephrine 384

Oedema, antenatal 39–51
Otitis media *see* Glue ear

Parental choice 122
Parental literacy 86–96
Parity 309–318
Parity, and childhood epilepsy 186–196
Parity, and congenital malformations 7–8
Past obstetric history 86–96
Past obstetric history, and childhood epilepsy 186–196
Paternal age 86–96, 301
Peer-review 264–266
Perinatal mortality 86–96
Perinatal mortality, and cocaine 269–278
Perinatal mortality, and prior CS 374–375
Perinatal mortality, and smoking 269–278
Placenta praevia 269–278
Placenta weight 213
Plasminogen 407
Pneumonia 175–185
Post-mortem *see* Autopsy
Postneonatal mortality 423–431
Power lines 32–38
Preterm, and cocaine 269–278
Preterm, and immigrant status 240–241
Preterm, and limb reduction defects 294–308
Preterm, and SIDS 309–318
Preterm, and smoking 269–278
Preterm, and social support 380–405
Preterm, and stress 380–405
Previous birth defect 186–196
Previous Down's syndrome 186–196
Previous miscarriage, and epilepsy 186–196
Previous spina bifida 186–196
Protein 150–160
Psychosocial development 339–354
Pyloric stenosis 6

Record, Reg 2–16
Research, implementation of findings 406
Retinopathy 407
Rural areas 175–185
Season of birth 6–7
Season, and SIDS 136–149
Sex differences 309–318
SIDS 136–149, 309–318
Small-for-gestational-age 309–318
Small-for-gestational-age, and cocaine 269–278
Small-for-gestational-age, and smoking 269–278
Smoking, maternal 269–278
Smoking, and stress 384–385, 392–393
Social circumstances 7
Social class 7
Social support 380–405
Stress 380–405
Study design 339–354, 443–462
Study design, and ethics 264–266
Sudden infant death syndrome *see* SIDS
Sulphur dioxide 23

Temperature, outdoor – and SIDS 136–149
Temporal variation 6–7
Termination 372–373
Time trends, in cancer 319–338
Time trends, in child development 197–206
Time trends, in low birthweight 130–135

Undescended testes *see* Cryptorchidism

Very low birthweight, survival 130–135
Very preterm survival 124–126

Weight gain, maternal 207–219, 220–234

Zinc 23
